SUMMARY

Product Designer with 2+ years across enterprise and web products, skilled in end-to-end **UX design, user research, usability testing, wireframing, prototyping, and design systems**. Simplifies complex workflows into scalable, user-centered solutions used by thousands of daily users.

EXPERIENCE

Web Designer I

vSplash TechLabs Pvt. Ltd.

Jun 2026 – Aug 2026

Hyderabad, India

- Designed **responsive client websites** on the **GoDaddy Website Builder** platform, turning brand guidelines and business goals into **conversion-focused layouts, clear visual hierarchy, and mobile-first responsive page structures** across multiple concurrent client projects.

UI/UX Designer

Houston Systems

Dec 2024 – May 2026

Greater Noida, India

- Designed **end-to-end UX flows, wireframes, prototypes, and interaction patterns** for ticketing, toll, parking, and ANPR systems supporting **10K+ daily users**.
- Conducted **user research, usability testing, and stakeholder interviews** with operators, then restructured **operator dashboards** through **information architecture and journey mapping**, reducing operational errors and processing delays.
- Built and maintained **scalable design systems** with **50+ reusable Figma components** using **Auto Layout and variants**, improving consistency and reducing **developer handoff time by 30%**.
- Designed and iterated **high-traffic stadium ticketing interfaces** for **IPL 2025**, supporting **180K+ entries across 6 days** with **zero critical UI issues** during live operations.

UI/UX Design Intern

Oges (P) Ltd.

Jul 2024 – Oct 2024

Gurugram, India

- Designed **enterprise UI workflows** for an **Oil & Gas flagship software** product, collaborating with remote teams across India and Dubai to maintain product consistency.

KEY PROJECTS

EMBER – AI-Powered Developer Companion | Product Design & Strategy

2026

- Architected **end-to-end UX** for a **GitHub-integrated AI developer companion**, designing a **multi-role permission system** (Super Admin, Project Manager, Developer) with scoped dashboards and privacy-aware chat history.
- Defined the **complete information architecture, role-based sitemap, and branching user flows** across three roles, mapping decision points, edge cases, and system states from OAuth onboarding to active chat sessions.
- Established **foundational design principles**: a **three-panel collapsible workspace**, read-only AI constraints to reduce adoption anxiety, model attribution per response, and invite-only onboarding for org-level access control.

Parking Management System | Enterprise SaaS Project

2025

- Led **end-to-end design** of a parking management system covering the full vehicle lifecycle (entry, ticketing, payment, exit), **reducing manual errors** through streamlined workflows and clear **information architecture**.
- Ran **user research with drivers and operators**, built wireframes and prototypes in **Figma**, and shipped with developers using shared **design systems**.

EDUCATION

Babu Banarasi Das Engineering College

Bachelor of Technology in Computer Science and Engineering

Lucknow, India

Graduated: 2024

TECHNICAL SKILLS

Design Tools: Figma, FigJam, Canva, Adobe Illustrator, GitHub, GoDaddy Website Builder

UX & Research: User Research, Usability Testing, Heuristic Evaluation, Journey Mapping, Wireframing, Prototyping, Information Architecture

Design Systems: Component Libraries, Auto Layout, Variants, Design Tokens, Responsive Design

Collaboration: Developer Handoff, Cross-functional Collaboration, Design QA, Agile Workflow

Domains: Enterprise SaaS, AI-driven Products, Dashboards, Real-Time Systems, Web & Mobile
